LITERATURE SURVEY:

TITLE	OWNER	ADVANTAGES	DISADVANTAGES
Zoho Inventory	Zoho Corporation	<ul style="list-style-type: none"> • It is simple to use. • Does all the basics well. • Is able to integrate with our CRM. 	<ul style="list-style-type: none"> • A little too linear, there could be more room for changing processes to fit business needs. • Inventory assumes everybody works the same way and needs to be more customizable. • Integrations with Shopify could be better.
iVend	CitiXsys	One of the few cloud & mobile epos systems out there that let a business run their way of operating, rather than having to go through major business process re-engineering for the software to work. The TRC team from Dublin give tremendous pre and post sales service.	The product have some limitations and hindrances when it was using along with SAP other than the standalone. All the supports are good, very helpful and responsive apart from slightly lack of communication during hand over stage of the particular subject from one team to one team.
Inventory management for retail companies	Cinthy Vanesa Munoz Macas, Jorge Andres Espinoza Aguirre, Rodrigo Arcentales-Carrion, Mario Pena	Retail companies have acquired significant importance within several countries due to their high economic contribution. Therefore, the need to analyze their KPIs becomes highly significant, as well as their different systems, methodologies, and tools used within inventory management and optimization.	A lack of products can be caused by various factors, including differences between product costs, which creates the possibility of a shortage of an expensive product and an excess of cheap products .There is an interaction effect between scarcity levels and price leadership.
